## **Copy Paste-X Version 1.6 - Utility - \$20.00**

One of the early wonders of the Mac was its revolutionary ability to do copy and paste across various applications. Unlike other areas in the Mac's system software that have changed and progressed over the years, copying and pasting has not evolved. How many times have you found yourself going back and forth copying in one application and pasting in a different application, wishing to yourself that you could copy 5-10 items at a time, then go to another application and paste each of these items. Now you can with a vengeance!

## **Watson 1.7.2 - Internet Utility - \$29.00**

A time-saving "Swiss Army Knife" program that packs over twenty time-saving, productivity-enhancing interfaces to the most important web content and services. URLs are hard to remember. Web services are scattered across the vastness of the web. Bookmark management is an oxymoron. Watson eliminates these problems and reduces your time-to-everything on the web -- Watson makes getting information from the Web simple and straightforward.

### **Labels X 1.5 - Utility - \$10.00**

Labels X adds file labeling features into Mac OS X. This means, you can apply various color tints to file icons, and sort the files by label. This gives you more freedom and options in organizing your files. Additionally, Labels X shares file label information with Mac OS 9, so no matter, where you label your files - you will see the labels in both Mac OS 9 and Mac OS X (file labeling is a built-in feature in Mac OS 9).

### **Menu Meters 1.1 - Utility - Freeware**

MenuMeters is a set of CPU, memory, disk, and network monitoring tools for MacOS X. Although there are numerous other programs which do the same thing, none had quite the feature set I was looking for. Most were windows that sat in a corner or on the desktop, which are inevitably obscured by document windows on a PowerBook's small screen. Those monitors which used the menubar mostly used the NSStatusItem API, which has the annoying tendency to totally reorder my menubar on every login.
